

João Tupinambá

São Luís, Maranhão • joaoh.tupinamba@gmail.com • linkedin.com/in/joaotupinamba • <https://tupi.dev>

A passionate and highly skilled Full Stack Developer with extensive experience in TypeScript, Java, and NestJS. Currently working at INAED – Management Solutions, responsible for all internal technological solutions. Known for leading complex projects, providing high-quality technical support, and developing innovative features that meet and exceed internal stakeholders' expectations. Committed to excellence and continuous growth, always seeking new challenges that drive professional evolution. In my free time, I am known as Tupi and have a passion for capoeira and the gym.

WORK EXPERIENCE

INAED • São Luís, Maranhão, Brazil

02/2024 – Present

Engenheiro de Software

- Internal Technological Architecture: Manage all internal technological solutions, ensuring seamless integration and efficient system operation.
- Full Stack Development: Lead full development from robust backend to intuitive and responsive front-end interfaces for internal use.
- Internal Training: Conducted comprehensive prompt engineering training for the entire team, enhancing the organization's technical competence.
- Team Leadership: Mentored an intern, providing continuous guidance, constructive feedback, and fostering a collaborative learning environment.
- Innovation and Custom Internal Solutions: Developed innovative features aligned with internal stakeholders' needs, resulting in customized solutions that add business value.

Economy Software

01/2023 – 02/2024

Full Stack Developer & Mobile

- Technological Migration: Executed the migration of critical system components from Java to JavaScript, ensuring a smooth and efficient transition.
- Agile Development: Responsible for continuous development of new features, quickly adapting to market and client demands.
- Customer Support: Acted as a direct point of contact, providing technical support, clarifying doubts, and ensuring total client satisfaction.
- Innovation in Printing: Created a revolutionary feature allowing the customization of orders through a text editor, surpassing traditional layout limitations in thermal printers.

Bravo Metalurgica • São Luís, Maranhão, Brazil

08/2023 – 08/2023

Frontend Developer

- Frontend Development: Developed and implemented a Landing Page according to design specifications, ensuring high visual and functional quality.
- Client Collaboration: Worked directly with the client to ensure all project expectations and requirements were met.

- Project Management: Managed projects autonomously from initial planning to final delivery, setting clear goals and strict deadlines.
- Leadership and Mentorship: Supervised an intern, promoting their development through detailed guidance and continuous support.
- Complete System Development: Created a website from scratch, including administration systems, user authentication, and a multimedia gallery platform.
